Summary

Full-Stack AI Engineer with 3+ years of experience building scalable web applications, backend services, analytics platforms, and AI-powered systems. Strong in **React.js, Next.js, Node.js, Python, FastAPI, REST/GraphQL APIs, PostgreSQL, MySQL, Redis, and ClickHouse**, with hands-on experience building and integrating **OpenAI APIs, RAG pipelines, AI agents, intent-based tool calling, SSE-based streaming APIs, and enterprise SSO**.

Experience

Software Developer Apr 2026 – Present
NeuIQ *Mumbai, India*

- **RFP Agent:** Built AI-powered proposal workflows using **OpenAI APIs, RAG retrieval, intent-based tool calling, and database querying**; implemented retrieval over chunked document data to support context-aware proposal search and generation.
- Designed and implemented a **document chunking and retrieval pipeline**, enabling relevant RFP content to be fetched from a knowledge base and supplied as context to LLM-powered workflows.
- Integrated an **SSE-based streaming API** for AI agents to deliver incremental agent responses and workflow updates to the frontend in real time.
- Integrated **Okta SSO** for secure enterprise authentication and access to the RFP platform; contributed to backend APIs and agent workflows for proposal retrieval and building.
- **Sample Management Console:** Reorganized backend services for survey lifecycle management, including retrieving survey data and automating survey creation on the **PureSpectrum** platform.
- Built **materialized views, Redis-based caching, and data-refresh workflows** to improve access to frequently queried survey and quota data and support efficient reporting.
- Developed **AI-agent-driven survey insights** for operational analysis, including identifying surveys falling behind targets, investigating potential causes, and surfacing quota-related insights.

Software Developer Feb 2025 – Mar 2026
StoreApps *Kandivali, Mumbai*

- Architected frontend migration of the **Putler** SaaS analytics platform to **Next.js, ShadCN, Apollo Client, and Socket.io**, improving UI responsiveness and reducing component load times; built real-time dashboards with **Chart.js** and **GraphQL** subscriptions for live data streaming.
- Shipped a **custom web analytics engine** from scratch, covering session tracking, event pipelines, **RocksDB** caching, and synchronization between **PostgreSQL and ClickHouse**.
- Built and optimized **Node.js** backend services handling multi-tenant analytics workloads and improved query performance on **ClickHouse** for large time-series datasets.
- Implemented **Keycloak**-based authentication using **NextAuth**, built custom authentication pages, and developed event-driven data synchronization from Keycloak to Putler's **PostgreSQL** database.
- Optimized frontend bundle size using **code splitting and lazy loading**, reducing initial page load time by 40% and improving Core Web Vitals; integrated **React Query** for client-side caching.

Full-Stack Developer Oct 2023 – Jan 2025
Alphawarenext Technologies *Powai, Mumbai*

- **Ladki Bahin Yojna (Maharashtra Govt.):** Built end-to-end using **React.js, Node.js, Express, and Sequelize** for a high-traffic government platform; implemented **Redis** caching for scalability and MySQL-backed bulk reporting.
- Developed a **data validation and sanitization pipeline** processing 10K+ form submissions per hour, implementing multi-layer validation across client, API, and database layers.
- **LMS (MyGLA, Galgotias):** Developed modular **REST APIs** in Node.js/Sequelize and revamped the frontend in **Next.js & TypeScript** with dynamic filtering, live data, and bulk Excel exports.
- Engineered a **role-based access control (RBAC) system** with permissions for 50K+ students and 500+ faculty members; built an automated assignment grading workflow.
- **GT20 Cricket Platform:** Built secure authentication, session handling, normalized MySQL schemas, and **AWS S3/CloudFront** backed media delivery.

Projects

RFP Agent | *Python, FastAPI, OpenAI API, RAG, SSE, PostgreSQL, LangGraph, Okta*

- AI-powered proposal platform combining document retrieval, chunk-based RAG, intent-driven tool execution, database queries, LLM-assisted proposal building, and SSE-based real-time agent streaming.

Sample Management Console | *Python, FastAPI, PostgreSQL, Redis, AI Agents, PureSpectrum*

- Survey operations platform for survey retrieval and creation, quota monitoring, materialized-view based reporting, Redis caching, automated data refreshes, and AI-generated operational insights.

Putler Analytics | *Next.js, GraphQL, ClickHouse, PostgreSQL, RocksDB* | demo.putler.com

- Production SaaS analytics platform with real-time dashboards, a custom analytics engine, and cross-database synchronization between PostgreSQL and ClickHouse.

Ladki Bahin Yojna Portal | *React.js, Node.js, MySQL, Redis* | ladakibahin.maharashtra.gov.in

- Government-scale platform for Maharashtra state handling high concurrent traffic with Redis caching and MySQL reporting.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL
AI & LLM: OpenAI API, RAG, AI Agents, LangGraph, Embeddings, Intent-Based Tool Calling, SSE Streaming
Frontend: React.js, Next.js, ShadCN, Chart.js, Recharts, HTML/CSS
Backend: Node.js, Express.js, FastAPI, GraphQL, Apollo Client, Sequelize, REST APIs
Databases: PostgreSQL, MySQL, MongoDB, ClickHouse, RocksDB
Caching & Messaging: Redis, RabbitMQ
Cloud & DevOps: AWS S3, Git, CI/CD Pipelines, Databricks
Authentication & Integrations: Okta SSO, Keycloak, NextAuth, Socket.io, PureSpectrum

Certifications

Claude Certified Architect – Professional | *Anthropic*

Education

Bachelor of Engineering in Computer Science June 2024
University of Mumbai – Vasantdada Patil Pratishthan's COE *CGPA: 8.05*
